

Problem Statement No. 22 – Interview Trainer Agent

The Challenge

An **Interview Trainer Agent**, powered by **Retrieval-Augmented Generation (RAG)**, prepares users for job interviews by generating tailored question sets and preparation strategies based on their profile, experience level, and target job role.

The agent retrieves role-specific interview questions, industry expectations, behavioral scenarios, and HR guidelines from recruitment portals, professional networks, and company interview databases.

Users can upload their resume or specify a job title to receive personalized interview questions, model answers, performance feedback, and improvement suggestions.

The system supports both **technical and soft-skill assessments**, providing a comprehensive interview preparation experience.

This AI-driven assistant helps users build confidence, improve communication skills, and increase their chances of success in competitive hiring processes.

Technology: IBM Cloud Lite Services and IBM Granite Models.
